Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Two baited minnow traps placed during Forest Practices Inspection; both captured coho. No apparent barriers up to Craig-Holli's Highway.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

SUBJECT: Anadromous Waters Atlas
Maps for 1992 Revision

I have reviewed the changes made in response to nominations I submitted. With the following exceptions, all changes are correct and appropriately drawn. The four streams listed below were all drawn too long. While I realize that there are limits to cartography in such circumstances, if they could be shortened about half their length it would be more accurate. As currently drawn, the upper ends are in stream reaches too steep to be anadromous fish habitat. The attached copy of the map sheet has the changes noted on it.

CRAIG C-3

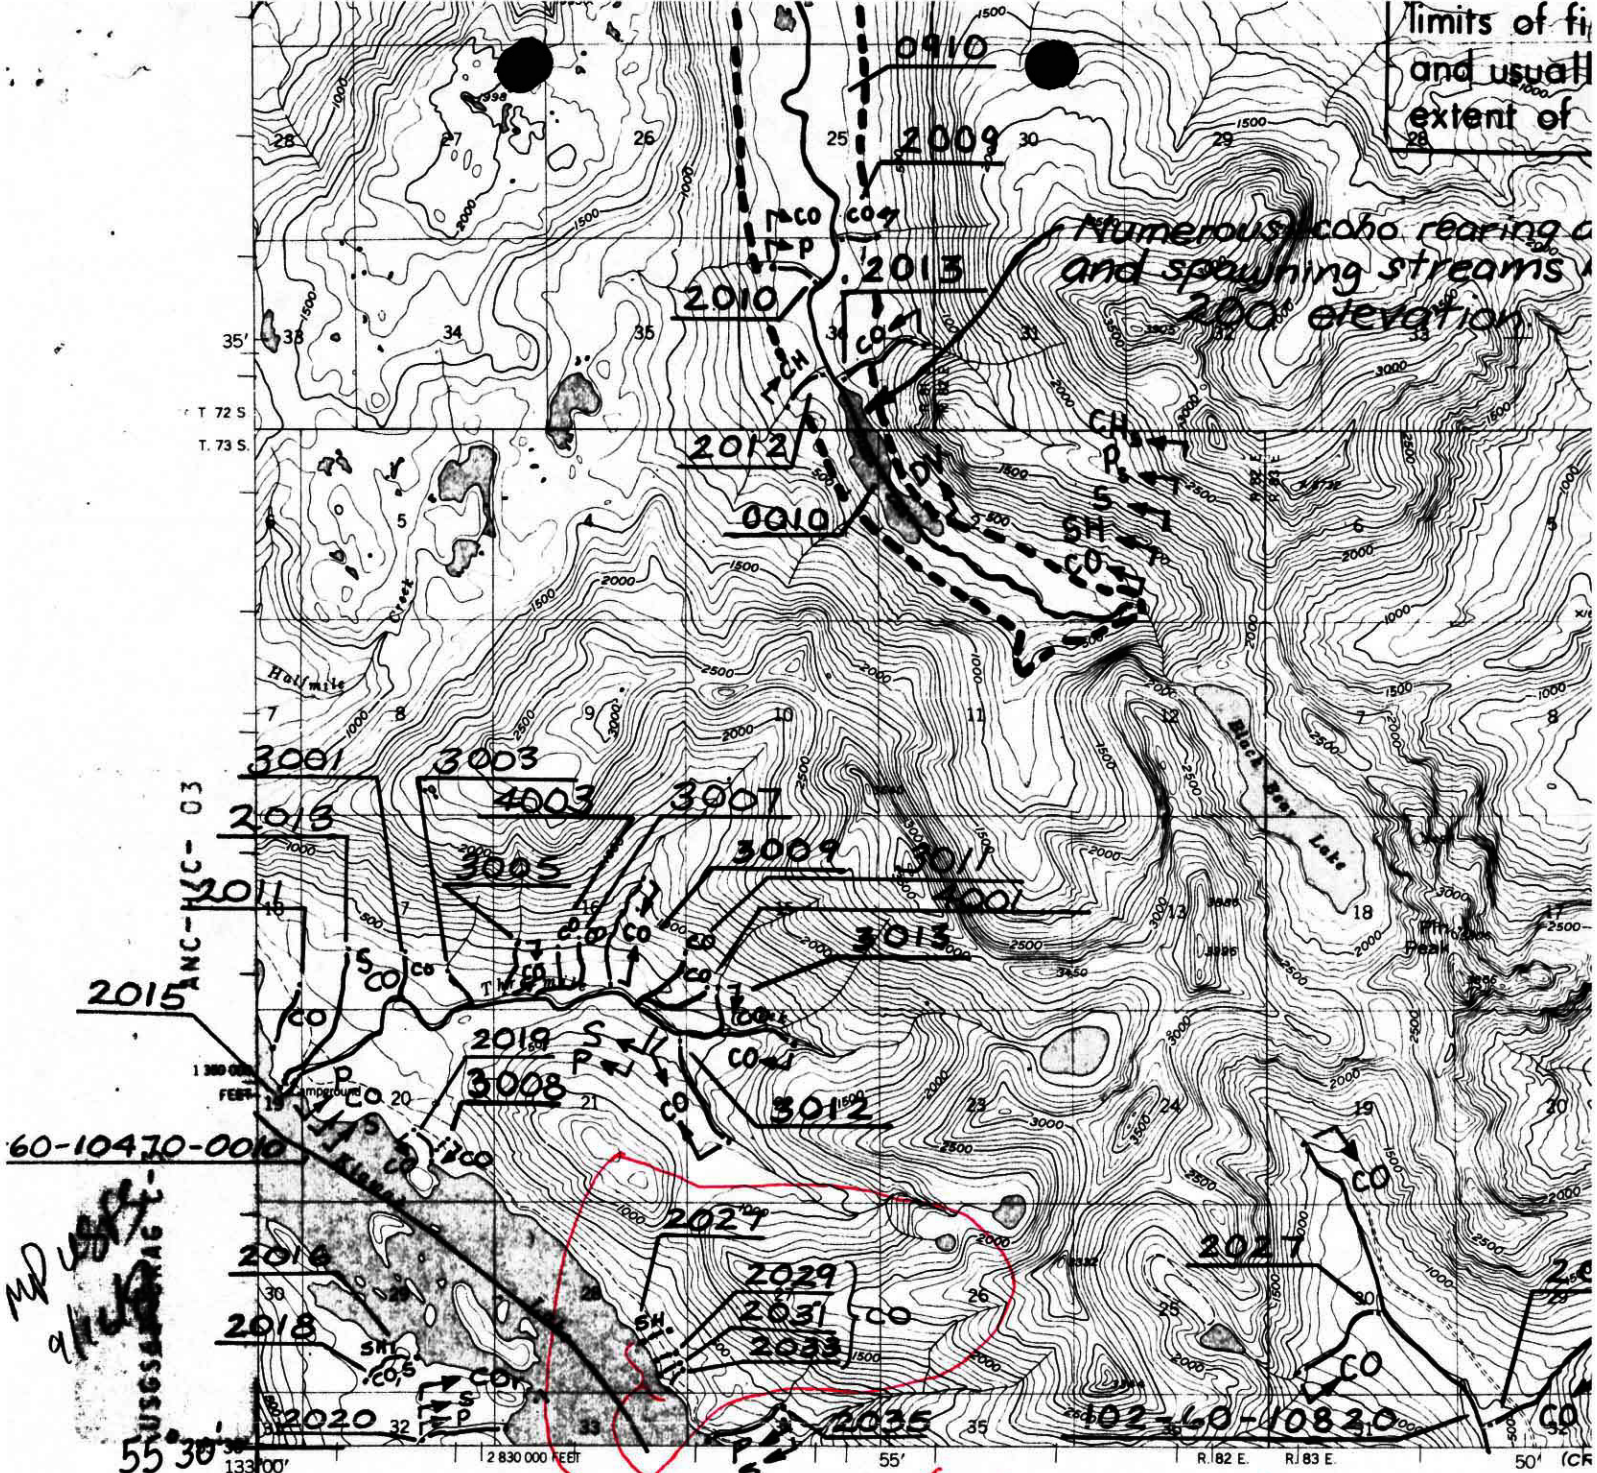

Shorten stream # 103-60-10470-2027 (SH)
Shorten stream # 103-60-10470-2029 (CO)
Shorten stream # 103-60-10470-2031 (CO)
Shorten stream # 103-60-10470-2033 (CO)
